EURO AGRI TRADING s.r.o.

EUROPEAN UNION / CZECH REPUBLIC

Product & Sourcing Catalogue

Fertilizers, phosphate materials
& selected specialty inputs

2026

EU-based sourcing.
Shipment-specific coordination.

CATALOGUE OVERVIEW

Our product range

Six product families; final specifications and availability confirmed per enquiry.

01 Phosphate materials — pp. 04–05

Rock phosphate powder · Granular rock phosphate / GRP · GRP + S / additives · Low-cadmium grades

02 Processed phosphates & compounds — pp. 06–10

GSSP 17% / 19% · GSP 20% · DSP 36% · TSP · DAP · MAP / granular ammophos 10-46-0 · NPK granular

03 Nitrogen fertilizers — pp. 11

Granular urea 46% N

04 Water-soluble fertilizers — pp. 12–15

MKP 0-52-34 · Urea phosphate 17-44-0 · Magnesium nitrate hexahydrate · Potassium nitrate / NOP 13-0-46

05 Micronutrients & specialty inputs — pp. 16

Zn · Fe · Mn · B · Cu · Mo · Selected specialty formulations

Documentation — COA, TDS, SDS / MSDS, REACH — p. 17

Trade execution — Packing, freight, Incoterms — p. 18

Buyer RFQ — What to send for a quotation — p. 19

Contact — Website, email, WhatsApp — p. 20

06 Raw materials & fertilizer additives — p. 21

Dolomite / calcium carbonate / phosphoric acid / potassium chloride (MOP)
Fertilizer additives and anti-caking agents. Specifications assessed per enquiry.

All prices are available upon RFQ. Listings describe the sourcing range; current availability and final specifications are confirmed per supplier and shipment.

AT A GLANCE

Quick reference matrix

Core fertilizer grades, physical form and packing. Raw materials and additives are listed on page 21. See individual product pages for specification requirements.

PRODUCT	LISTED GRADE	FORM	PACKING	PAGE
Rock phosphate powder	18–34% P_2O_5	Powder / fine powder	Bulk / big bags	04
Granular rock phosphate / GRP (+ S)	Per RFQ	Granular	Bulk / big bags	05
GSSP	17% / 19% P_2O_5	Granular	Bulk / big bags	06
GSP	20% P_2O_5	Granular	Bulk / big bags	06
DSP	36% P_2O_5	Granular	Bulk / big bags	06
TSP	0-46-0	Granular	Bulk / big bags / bags	07
DAP	18-46-0	Granular	Bulk / big bags / bags	08
MAP / granular ammophos	10-46-0	Granular	Big bags / as agreed	09
NPK granular	Various formulas	Granular	As agreed with supplier	10
Granular urea	46% N	Granular	Bulk / big bags / bags	11
MKP	0-52-34	White crystalline	25 kg / big bags	12
Urea phosphate	17-44-0	Crystalline	25 kg / big bags	13
Magnesium nitrate hexahydrate	Mg + N (shipment-specific)	Flakes / crystals	25 kg / big bags	14
Potassium nitrate / NOP	13-0-46	White crystalline	25 kg / big bags	15
Micronutrients (Zn Fe Mn B Cu Mo)	Product-specific	Per product	Product-specific	16

How to read the specification tables

Grade names identify the sourcing range, not guaranteed nutrient minima. Product form and packing are subject to confirmation. The agreed specification defines limits and test methods; the shipment COA records the analytical results for an identified lot.

Raw materials and fertilizer additives: see page 21.

PHOSPHATE MATERIALS / 01

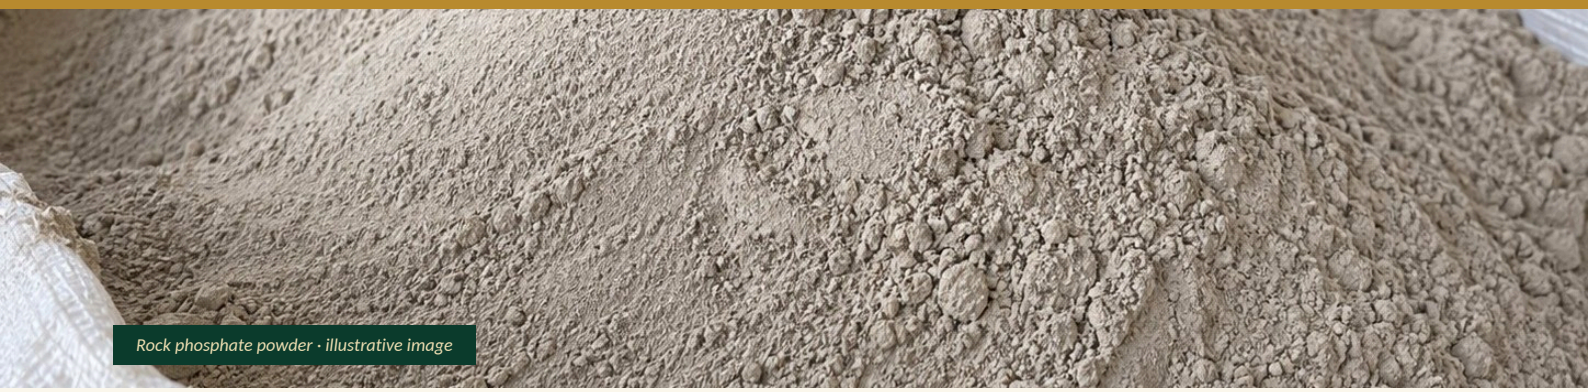

Rock phosphate powder

Multi-origin sourcing for industrial and formulation applications, subject to grade and destination requirements.

LISTED GRADE

18–34%

P_2O_5 · BY ORIGIN

Rock phosphate powder · illustrative image

GRADE	FORM	PACKING	SUPPLY TERMS
18–34% P_2O_5	Powder / fine powder	Bulk / big bags	EXW / FOB / CFR / CIF

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
P2O5 grade	18-34% by origin; exact grade and declaration basis per RFQ.
Fineness	Powder / fine powder; particle size agreed with the supplier.
Moisture	Limit to be confirmed in the supplier specification.
Solubility / reactivity	Product-specific data requested where relevant to intended use.
Cadmium / heavy metals	Required limits and reporting units agreed for the destination.
Origin	Confirmed for the shipment; certificate of origin as agreed.
Verification	Supplier TDS and shipment COA; test methods stated in the report.

APPLICATIONS

- Feedstock for industrial and formulation use
- Blending into phosphate and compound fertilizers
- Direct application on acidic soils, subject to reactivity and local regulation

PACKING, DOCUMENTS & TERMS

- Packing: bulk or big bags, as agreed
- Documents: shipment-specific COA, Cd and heavy-metals data, inspection when agreed
- Terms: EXW / FOB / CFR / CIF where contractually agreed

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

PHOSPHATE MATERIALS / 02

Granular rock phosphate GRP · GRP + S

Product form and composition are matched to the buyer specification and available supply origin, including low-cadmium options.

LISTED GRADE

GRP

GRANULAR · S / LOW-Cd OPTIONS

Granular phosphate · illustrative image

PRODUCT	VARIANTS	SPECIAL GRADES	PACKING
Granular rock phosphate / GRP	GRP + S / additives	Low-cadmium options	Bulk / big bags

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Product / variants	GRP; GRP + S or additives, subject to supplier confirmation.
P2O5 grade	Required nutrient grade stated in the RFQ and confirmed in the TDS.
Granule size / hardness	Size distribution and strength confirmed by the selected supplier.
Moisture	Product-specific limit confirmed in the supplier specification.
Sulphur / additives	Content, chemical form and composition declared per formulation.
Low-cadmium options	Required Cd limit reviewed against product and shipment data.
Verification	Supplier TDS and shipment COA; test methods stated in the report.

APPLICATIONS

- Direct application where agronomy and soil conditions suit
- Sulphur-enriched variants for sulphur-demanding crops
- Markets with strict cadmium requirements (low-Cd options)

PACKING, DOCUMENTS & TERMS

- Packing: bulk, big bags or other agreed packing
- Documents: COA, physical specification, Cd and heavy-metals data; inspection scope as agreed
- Provide destination requirements and analytical limits in the RFQ

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

PROCESSED PHOSPHATES / 01

GSSP · GSP · DSP

GSSP: single superphosphate; DSP: double superphosphate.
GSP is retained as a supplier-specific commercial designation.

LISTED GRADE

17–36%

P_2O_5 · GRADE RANGE

Processed phosphate · illustrative image

GSSP	GSP	DSP	FORM
17% / 19%	20%	36%	Granular

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Listed grades	GSSP 17% / 19%; GSP 20%; DSP 36% - separate product grades.
Phosphate declaration	Total, available and soluble fractions specified in supplier documents.
Sulphur / calcium	Content confirmed for the selected grade; no common minimum assumed.
Granule size	Size distribution confirmed in the supplier specification.
Moisture	Product-specific limit confirmed in the supplier specification.
Cadmium / heavy metals	Required limits reviewed against destination and shipment data.
Verification	Supplier TDS and shipment COA; test methods stated in the report.

APPLICATIONS

- Basal phosphate for cereals, oilseeds and pasture
- GSSP additionally supplies sulphur and calcium
- Blending component for NPK and bulk-blend programmes

PACKING, DOCUMENTS & TERMS

- Packing: bulk, big bags or other agreed packing
- Confirm before quotation: nutrient declaration, solubility parameters, physical form, packing and documents
- Documents: COA, TDS, SDS / MSDS

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

PROCESSED PHOSPHATES / 02

TSP
Triple superphosphate

High-analysis granular phosphate fertilizer. Sourcing subject to current supplier confirmation and destination-market requirements.

REFERENCE GRADE

0-46-0

TSP - CONFIRM PER RFQ

TSP reference sample · credits on last page

GRADE	FORM	PACKING	QUOTATION
0-46-0 - per RFQ	Granular	Bulk / big bags / bags	Per RFQ

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Product / grade	TSP; reference grade 0-46-0, subject to supplier confirmation.
Phosphate declaration	Total, available and water-soluble P2O5 stated separately in the TDS.
Granule size	Size distribution confirmed in the supplier specification.
Moisture	Product-specific limit confirmed in the supplier specification.
Appearance / packing	Confirmed for the selected product and shipment.
Cadmium / heavy metals	Destination requirements reviewed against the shipment COA.
Verification	Supplier TDS, COA and SDS; analytical methods stated in the report.

APPLICATIONS

- Basal application for P-demanding crops
- Starter phosphate in low-N programmes
- Component in bulk blends

PACKING, DOCUMENTS & TERMS

- Packing: bulk, big bags or bags, agreed per RFQ
- Documents: COA, TDS, SDS / MSDS; Cd data where required
- Provide the technical specification and destination in the RFQ

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

PROCESSED PHOSPHATES / 03

DAP
Diammonium phosphate

Granular nitrogen–phosphorus fertilizer. Grade and current supply options are confirmed per RFQ.

REFERENCE GRADE

18-46-0

DAP - CONFIRM PER RFQ

DAP reference sample · credits on last page

GRADE	FORM	PACKING	QUOTATION
18-46-0 - per RFQ	Granular	Bulk / big bags / bags	Per RFQ

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Product / grade	DAP; reference grade 18-46-0, subject to supplier confirmation.
Nitrogen / phosphate	N and phosphate fractions declared in the supplier specification.
Granule size	Size distribution confirmed in the supplier specification.
Moisture	Product-specific limit confirmed in the supplier specification.
Appearance / packing	Confirmed for the selected product and shipment.
Cadmium / heavy metals	Destination requirements reviewed against the shipment COA.
Verification	Supplier TDS, COA and SDS; analytical methods stated in the report.

APPLICATIONS

- Basal and starter fertilizer for most field crops
- Blending component for NP and NPK programmes
- Preferred where early phosphorus supply is required

PACKING, DOCUMENTS & TERMS

- Packing: bulk, big bags or bags, agreed per RFQ
- Documents: COA, TDS, SDS / MSDS; Cd data where required
- Product documents reviewed for the selected supply channel

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

PROCESSED PHOSPHATES / 04

MAP
Granular ammophos

Granular ammonium phosphates; composition confirmed per source.

LISTED GRADE

10-46-0

MAP · NP GRADE

Granular MAP · illustrative image

GRADE	FORM	PACKING	QUOTATION
10-46-0	Granular	Big bags / supplier-confirmed	Qty, destination, window

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Listed grade	MAP / granular ammophos 10-46-0; supplier declaration applies.
Nitrogen / phosphate	N, total P2O5 and soluble fractions confirmed in the supplier TDS.
Granule size	Size distribution confirmed in the supplier specification.
Moisture	Product-specific limit confirmed in the supplier specification.
Packing	Big bags or other supplier-confirmed packing, agreed per RFQ.
Cadmium / heavy metals	Required limits reviewed against destination and shipment data.
Verification	Supplier TDS, shipment COA and SDS; test methods per report.

APPLICATIONS

- Phosphorus-rich NP source for basal use
- Suitable for blending with N and K sources
- Low-nitrogen start for legumes and root crops

PACKING, DOCUMENTS & TERMS

- Packing: big bags or other supplier-confirmed packing, agreed per RFQ
- Documents: COA, TDS, SDS / MSDS; Cd and other data where required
- Quotation: quantity, destination, delivery window and supply terms

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

COMPOUND FERTILIZERS

NPK granular

Various formulas, sourced according to the buyer requirement and current supplier confirmation.

LISTED GRADE

NPK

VARIOUS FORMULAS

Compound fertilizer granules · illustrative image

FORMULA	FORM	PACKING	AVAILABILITY
Various; per RFQ	Granular	Agreed with supplier	Confirmation before quotation

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Formula	Requested N-P2O5-K2O formula confirmed with the selected supplier.
Nitrogen forms	Ammoniacal, nitrate and urea shares declared for the specific formula.
Chloride	Content and any low-chloride requirement confirmed per product.
Granule size / moisture	Physical specification and limits confirmed in the supplier TDS.
Secondary / micronutrients	Composition and availability confirmed for the requested formulation.
Cadmium / heavy metals	Required limits reviewed against destination and shipment data.
Verification	Supplier TDS, shipment COA and SDS; test methods per report.

APPLICATIONS

- Basal and top-dressing programmes for field crops
- Formula matched to crop and soil requirement
- Options with secondary nutrients on request

PACKING, DOCUMENTS & TERMS

- Packing: product-specific, agreed with the supplier
- Documents: supplier specification, COA and safety documents
- Specify required formula, physical form and destination in the RFQ

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

NITROGEN FERTILIZERS

Granular urea

Nitrogen fertilizer sourced according to buyer requirements and current supplier confirmation.

LISTED GRADE

46% N

UREA · NITROGEN

Granular urea · illustrative image

GRADE	FORM	PACKING	QUOTATION
46% N	Granular	Bulk / big bags / bags	Qty, destination, window

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Listed grade	Granular urea 46% N; exact declaration confirmed by supplier TDS.
Biuret	Maximum limit confirmed for the selected agricultural grade.
Moisture	Maximum limit confirmed in the supplier specification.
Granule size	Particle-size range and distribution confirmed per supplier.
Appearance / packing	Confirmed for the selected product and shipment.
Documents	TDS, shipment COA and SDS; regulatory documents where applicable.
Verification	Agreed limits checked against shipment results; methods per report.

APPLICATIONS

- Primary nitrogen source for cereals, maize and sugar crops
- Base material for NPK blending
- Top-dressing and basal programmes

PACKING, DOCUMENTS & TERMS

- Packing: bulk, big bags or bags, as available and agreed per RFQ
- Documents: COA, TDS, SDS / MSDS; regulatory documents where applicable
- Quotation: quantity, destination, packing, delivery window and supply terms

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

WATER-SOLUBLE FERTILIZERS / 01

MKP
Monopotassium phosphate

Water-soluble phosphorus and potassium source for fertigation and foliar nutrition.

LISTED GRADE

0-52-34

MKP · WATER-SOLUBLE

Water-soluble crystalline material · illustrative image

GRADE	FORM	PACKING	USE
0-52-34	White crystalline	25 kg / big bags	Fertigation / foliar

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Listed grade	MKP 0-52-34 is a grade designation, not a guaranteed minimum.
P2O5 / K2O	Guaranteed minima confirmed in the selected supplier TDS.
pH / solubility	Supplier data with solution concentration, temperature and units.
Insolubles / moisture	Product-specific limits confirmed in the supplier specification.
Packing	25 kg bags, big bags or customized packing, as agreed.
Heavy metals / documents	COA, TDS and SDS; heavy-metals and REACH data where applicable.
Verification	Actual shipment assessed against the agreed supplier specification.

APPLICATIONS

- Fertigation and drip systems in greenhouse and open field
- Foliar sprays at flowering and fruit-set
- Chloride limit per product specification

PACKING, DOCUMENTS & TERMS

- Packing: 25 kg bags, big bags or customized packing
- Documents: COA, TDS, SDS / MSDS; REACH documentation where applicable
- Final use and compatibility confirmed by buyer agronomy and product documentation

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

WATER-SOLUBLE FERTILIZERS / 02

UP
Urea phosphate

Acidic water-soluble fertilizer for fertigation and phosphorus / nitrogen supply.

LISTED GRADE

17-44-0

UREA PHOSPHATE

Greenhouse cultivation context · credits on last page

GRADE	FORM	PACKING	REACTION
17-44-0	Crystalline	25 kg / big bags	Acidic

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Listed grade	Urea phosphate 17-44-0; exact nutrient declaration per supplier TDS.
pH / acidity	Supplier data with solution concentration and test conditions.
Water-insoluble matter	Product-specific limit confirmed in the supplier specification.
Moisture	Maximum limit confirmed in the supplier specification.
Appearance / packing	Confirmed per supplier; 25 kg bags or big bags, as agreed.
Documents	TDS, COA and SDS; government test report where applicable.
Verification	Use, compatibility and handling reviewed against product documents.

APPLICATIONS

- Acidifying P and N source for drip lines and hard-water correction
- Fertigation in greenhouse and high-value crops
- Handle per product-specific SDS; avoid concentrated mixes with calcium products

PACKING, DOCUMENTS & TERMS

- Packing: 25 kg bags or big bags
- Documents: COA, TDS, SDS / MSDS; government test report where applicable
- Quotation: availability, inspection needs and supply terms reviewed per RFQ

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

WATER-SOLUBLE FERTILIZERS / 03

Magnesium nitrate hexahydrate

Water-soluble magnesium and nitrogen source for fertigation and specialty nutrition programs.

LISTED GRADE

Mg + N

$Mg(NO_3)_2 \cdot 6H_2O$

Magnesium nitrate flakes · illustrative image

FORMULA	FORM	PACKING	MOLAR MASS
$Mg(NO_3)_2 \cdot 6H_2O$	White flakes / crystals	25 kg / big bags	256.4 g/mol

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Product identity	Magnesium nitrate hexahydrate; form confirmed by supplier TDS.
Nitrogen / magnesium	N, Mg and/or MgO contents declared for the selected product.
Solubility	Supplier data with temperature, reporting basis and units.
Insolubles / moisture	Product-specific limits and handling requirements per supplier TDS.
Packing / storage	Agreed packing; storage and handling follow the product SDS.
Heavy metals / documents	COA, TDS and SDS; REACH and heavy-metals data where applicable.
Verification	Actual shipment assessed against the agreed supplier specification.

APPLICATIONS

- Magnesium and nitrate supply in fertigation
- Compatibility confirmed for the product, water and mixing conditions
- Application rates determined by buyer agronomy

PACKING, DOCUMENTS & TERMS

- Packing: 25 kg bags or big bags
- Documents: COA, TDS, SDS / MSDS; REACH and heavy-metals data where applicable
- Quotation: quantity, destination and required specification

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

WATER-SOLUBLE FERTILIZERS / 04

Potassium nitrate / NOP

Potassium and nitrate nitrogen source for high-value crops. Chloride content and suitability are confirmed per product.

LISTED GRADE

13-0-46

POTASSIUM NITRATE

Potassium nitrate crystalline material · illustrative image

GRADE	FORM	PACKING	CHLORIDE
13-0-46	White crystalline	25 kg / big bags	Per supplier TDS

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Listed grade	Potassium nitrate / NOP 13-0-46; declaration per supplier TDS.
N / K2O / chloride	Guaranteed nutrient and chloride limits confirmed per product.
Solubility	Supplier data with temperature, reporting basis and units.
Insolubles / moisture	Product-specific limits confirmed in the supplier specification.
Particle size / packing	Confirmed per RFQ; 25 kg bags or big bags, as agreed.
Heavy metals / documents	COA, TDS and SDS; REACH documentation where applicable.
Verification	Suitability for sensitive crops assessed against actual chloride data.

APPLICATIONS

- Fertigation and foliar nutrition for suitable crops
- Suitability for chloride-sensitive crops confirmed per product
- Application rates determined by buyer agronomy

PACKING, DOCUMENTS & TERMS

- Packing: 25 kg bags or big bags
- Documents: COA, TDS, SDS / MSDS; REACH documentation where applicable
- Quotation: quantity, destination, Incoterm and delivery window

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

MICRONUTRIENTS & SPECIALTY INPUTS

Micronutrients & specialty inputs

Micronutrients and specialty formulations reviewed against verified buyer demand and supplier availability.

LISTED GRADE

Zn Fe Mn B Cu Mo

SIX KEY ELEMENTS

Plant nutrition assessment · illustrative image

ELEMENTS	FORMS	PACKING	AVAILABILITY
Zn · Fe · Mn · B · Cu · Mo	Supplier-confirmed forms per RFQ	**Product-specific**	**Confirmation required**

Specification to confirm

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Zinc / iron	Required chemical form, nutrient content and solubility specified in RFQ.
Manganese / copper	Required chemical form, nutrient content and solubility specified in RFQ.
Boron / molybdenum	Product identity and concentration confirmed by selected supplier.
Chelated formulations	Chelating agent and chelated fraction confirmed if offered.
Application / compatibility	Use and suitability assessed against product-specific documentation.
Availability / packing	Supplier confirmation required for each product and shipment.
Verification	Supplier TDS, COA, SDS and required contaminant data.

APPLICATIONS

- Product-specific correction of nutrient deficiencies
- Soil or foliar use as supported by product documentation
- Additional products reviewed upon confirmed demand

PACKING, DOCUMENTS & TERMS

- Packing: product-specific; confirmed availability required
- Documents: product-specific COA, TDS, SDS / MSDS and heavy-metals data where required
- Formulation, grade and documents depend on supplier confirmation and destination

Product specifications, test methods and availability are confirmed for each supplier and shipment. Agreed supplier TDS and shipment COA govern the final declaration. Suitability is reviewed for the intended application.

DOCUMENTATION & INSPECTION

The documentation package

Document availability depends on the product, supplier, contract and shipment.

COA per shipment

Analysis tied to the agreed grade and shipment lot.

TDS / specification

Technical parameters for the selected product.

SDS / MSDS

Product-specific safe handling documentation.

Regulatory review

REACH and EU documentation where applicable.

Heavy metals

Cadmium and heavy-metals data where required.

Independent inspection

SGS / Intertek / Bureau Veritas or equivalent when agreed. COO and inspection reports as required.

Laboratory setting · credits on last page

Shipment document checks

PARAMETER	SUPPLIER / SHIPMENT CONFIRMATION
Product identity	Correct product, grade, supplier and batch identified.
Nutrients / physical data	Compare results with agreed limits and stated analytical methods.
Contaminants	Check required elements, units, limits and reporting basis.
Supporting documents	Review TDS, SDS, origin and inspection documents as required.

PACKING & TRADE EXECUTION

From supply origin to destination

Shipment planning brings together the product, packing, transport route and commercial structure.

Container port operations · credits on last page

Packing

Bulk, big bags and 25 kg / 50 kg bags, depending on the product and supplier.

Sea freight

20GP / 40GP containers and bulk cargo where suitable. EXW / FOB / CFR / CIF as agreed.

Inland delivery

Container pickup, full and partial truckloads, cross-border EU transport and 24–25 MT truckloads where appropriate. DAP / DDP support where feasible and agreed.

Supply terms - Incoterms 2020

TERM	TRANSPORT / SCOPE
EXW / FCA	Any mode: EXW at seller premises; FCA at the named delivery point.
FOB / CFR / CIF	Sea / inland waterway only; CIF includes seller-arranged insurance.
DAP / DDP	Any mode; DDP includes import clearance and duties, as applicable.

Payment & commercial coordination

LC at sight is preferred where suitable. Other structures are reviewed for the transaction. Supplier identities and sensitive documents are shared after buyer verification and RFQ alignment.

BUYER RFQ

A clear request. A practical quotation.

Provide the following information so availability, documents and commercial terms can be reviewed.

01

Buyer company

Legal name, country, website, contact person and transaction role.

02

Product & grade

Product name, formula / grade, technical target and intended application.

03

Quantity & timing

Trial quantity, monthly or annual demand and delivery window.

04

Destination & packing

Port or delivery place, country, required Incoterm and packing.

05

Required documents

COA, TDS, SDS / MSDS, REACH, heavy-metals data, COO or inspection report.

06

Payment & inspection

LC at sight or other proposed structure; SGS / Intertek / BV needs, if any.

Commercial reference

Product availability, specifications, prices, documents, inspection scope, Incoterms and payment structures are confirmed per RFQ and shipment. This catalogue is not a sales contract or guarantee of supply; final obligations follow the relevant contract.

RAW MATERIALS / TECHNICAL REVIEW

Raw materials & additives

Material identity, intended use and specification confirmed per enquiry.

Dolomite | CaMg(CO3)2

Natural calcium-magnesium carbonate mineral. Confirm mineral composition, Ca/Mg reporting basis, fineness and, for agricultural liming, neutralising value and reactivity. An oxide-basis analysis does not establish calcined material.

Calcium carbonate | CaCO3

Identify ground or precipitated material and intended use. Confirm CaCO3 assay, particle size, impurities and relevant agricultural or industrial requirements. CaCO3, Ca and CaO are different reporting bases.

Phosphoric acid | H3PO4

Declare concentration as mass percent H3PO4 or P2O5 equivalent, with the basis explicit. Confirm acid grade, impurities, density and test temperature, compatible packaging and product-specific safety documentation.

Potassium chloride | KCl | MOP

Muriate of potash is potassium chloride. K2O equivalent is not KCl purity. Confirm nutrient grade, physical form and impurities; this material inherently contains chloride and differs from NOP and SOP.

Fertilizer additives & anti-caking agents

Identify composition, carrier and the fertilizer to be treated. Agree application conditions, compatibility and measurable performance under defined trials. No universal dosage or performance guarantee applies.

Listings describe the enquiry scope, not confirmed stock or an approved supplier for every item. The agreed TDS sets limits and methods; the COA reports results for an identified sample or lot. Source documents and destination requirements must support the proposed use.
