EURO AGRI TRADING s.r.o.

EUROPEAN UNION / CZECH REPUBLIC

Company Profile

Fertilizer sourcing &
trade coordination

2026

EU-based sourcing.
Shipment-specific coordination.

COMPANY

About Euro Agri Trading

Illustrative imagery

An EU-based commercial coordination company focused on fertilizers, phosphate materials and selected specialty inputs.

Euro Agri Trading s.r.o. connects qualified buyers with selected suppliers and manufacturing partners across multiple origins. Each opportunity begins with a specific request for quotation (RFQ).

We match product requirements with supplier capability, documentation and commercial terms. Logistics and shipment coordination form part of the transaction from the start.

EU-based coordination

Registered in the Czech Republic and positioned for fertilizer transactions serving European markets.

Multiple supply origins

Supply options depend on the product, destination, documents and feasible transport routes.

Our role covers sourcing and transaction coordination. Sensitive counterparty information is shared at the appropriate commercial stage.

HOW WE WORK

Our sourcing process

Verification deepens as the opportunity becomes commercially feasible.

01 Qualified demand

Clarify the buyer, product, quantity, destination, delivery window and payment preference.

02 Supply selection

Match the specification with origin, packing, supplier capability and document requirements.

03 Commercial feasibility

Check current price, delivery terms, lead time and payment structure.

04 Document review

Review product, regulatory and shipment documents at the relevant stage.

05 Transaction protection

Agree the transaction structure and protect sensitive identities and commercial terms.

06 Execution support

Coordinate inspection, document flow and shipment milestones in line with the contract.

PRODUCT RANGE / 01

Phosphate materials

Illustrative imagery

ROCK PHOSPHATE

18-34%

P2O5 - by origin

Powder / fine powder

Rock phosphate powder

Sourcing by origin and allocation. Exact grade, physical specification and packing are confirmed for the requested shipment.

Granular rock phosphate

GRP grades confirmed per RFQ.

GRP + S / additives

Sulfur and additive formulations, subject to supplier confirmation.

Low-cadmium grades

Shipment-specific cadmium and heavy-metals data.

Grade, origin, availability and supporting documents are confirmed for each request and shipment.

PRODUCT RANGE / 02

Mineral & compound fertilizers

Sourcing through selected supplier and manufacturing channels.

Illustrative imagery

GSSP Granular, with supplier-specific parameters.	17% / 19%
GSP Sourcing through selected supply channels.	20%
DSP Sourcing through selected supply channels.	36%
TSP / DAP Current supplier confirmation required.	Per RFQ
MAP / granular ammophos Granular ammonium phosphates. Final composition per supplier.	10-46-0
NPK granular Various formulas, subject to current supplier confirmation.	Formulas
Granular urea Nitrogen fertilizer. Availability and documents confirmed per RFQ.	46% N

Product listings describe the sourcing range. They do not confirm stock or immediate availability.

PRODUCT RANGE / 03

Water-soluble fertilizers

Illustrative imagery

MKP

0-52-34

Monopotassium phosphate

Urea phosphate

17-44-0

Water-soluble nitrogen and phosphorus

Potassium nitrate / NOP

13-0-46

Potassium and nitrate nitrogen

Magnesium nitrate

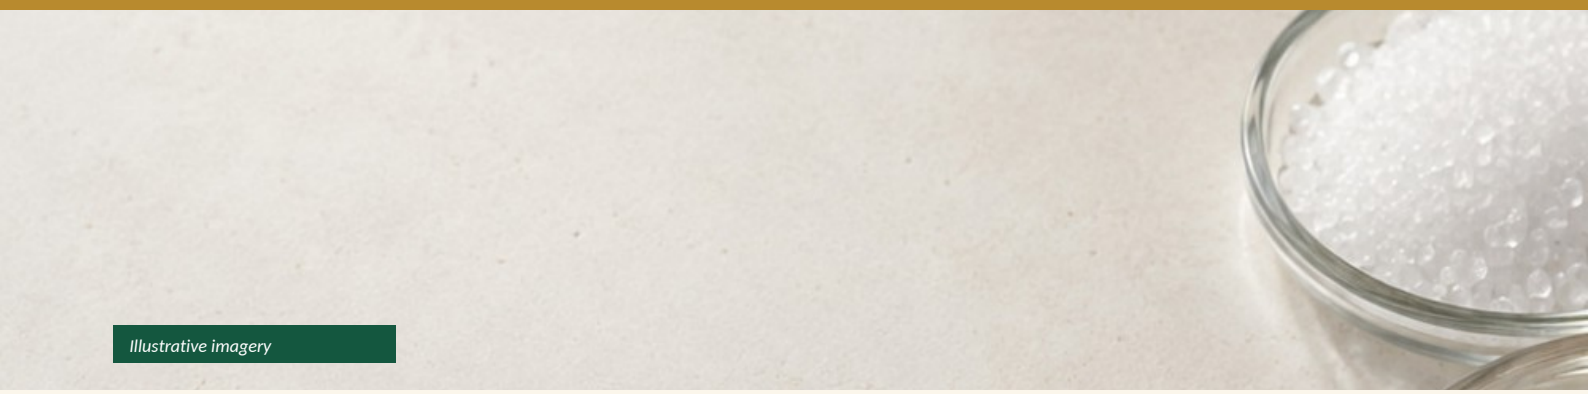

Hexahydrate

Shipment-specific parameters and documentation

Grade names identify the sourcing range. Final nutrient declaration, specification and supply terms are confirmed per RFQ and supplier.

PRODUCT RANGE / 04

Micronutrients & specialty inputs

Illustrative imagery

Selected micronutrients and formulations matched to the buyer's requirements.

Zn
Zinc

Fe
Iron

Mn
Manganese

B
Boron

Cu
Copper

Mo
Molybdenum

Selected specialty formulations

Formulation, grade and documents depend on current supplier confirmation and the intended destination.

DOCUMENTATION

Documentation & inspection

Product documents

COA linked to the lot and agreed grade. TDS / specification and SDS / MSDS for the relevant product.

Regulatory review

EU and REACH documentation where applicable. Cadmium and heavy-metals data where required.

Illustrative imagery

Independent inspection

Inspection through SGS, Intertek or Bureau Veritas may be coordinated when agreed. COO and commercial documents follow the transaction requirements.

Document integrity

Scanned, converted or re-saved material documents remain integrity-unverified until original issuer files or independent verification are available.

MARKETS & ORIGINS

Markets & supply origins

Illustrative imagery

Buyer-market focus

- Central Europe
- Northern Europe
- Eastern Europe
- Western Europe
- Southern Europe
- Turkey

Supply-origin approach

- Europe
- North Africa
- Turkey
- China / Asia
- Selected global origins

Origin options depend on the product, documentation and route feasibility. Coverage is assessed transaction by transaction.

LOGISTICS

Logistics & packing

Illustrative imagery

Packaging

Bulk, big bags and 25 kg / 50 kg bags, depending on the product.

Sea freight

20GP / 40GP containers and bulk cargo where suitable. Delivery terms are agreed for the selected transport route.

Inland delivery

Container pickup, full and partial truckloads, and cross-border EU transport. 24-25 MT truckloads where appropriate.

Delivery coordination

Port-to-door, customs coordination and DAP / DDP support where commercially feasible and agreed.

Transport arrangements are coordinated through independent providers according to the cargo, route and agreed responsibilities.

COMMERCIAL COORDINATION

A clear transaction framework

Current commercial terms

Price, availability, packing, lead time and payment structure are confirmed for the actual request.

Protected counterparties

Buyer and supplier identities and sensitive commercial documents are shared at the appropriate stage.

Shipment-specific commitments

Final product values and compliance files relate to the actual supplier and shipment.

Repeat business

Supplier and logistics relationships are assessed through documentation, responsiveness and transaction performance.

Information for an RFQ

Product and grade, quantity, destination, packing, delivery terms, target delivery window and payment preference.
